DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4-16, 22, 25, and 26, drawn to canceling noise in a system, classified in class 381, subclass 71.1.
- Claims 17-20, drawn to an air induction system noise cancellation system, classified in class 381, subclass 71.5.
- III. Claims 21, 23, and 24, drawn to canceling noise with respect to throttle and engine noise, classified in class 381, subclass 71.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention III can be used specifically for canceling or attenuating noise with the engine of a vehicle including speed and throttle position. The subcombination has separate utility such as invention I which can be used in any type of system that is subjected to noise, and invention III, specifically is intended for use with environments with noise generated within areas

Application/Control Number: 09/827,794

Art Unit: 2644

exposed to an air induction system, such as air ducts in a building, air compressors in appliances, ect.

Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Groups I and II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Justin Michalski whose telephone number is (703)305-5598. The examiner can normally be reached on 8 Hours, 5 day/week.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bill Isen can be reached on (703)305-4386. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
